### **ABOUT THE SEMINAR (CONCEPT NOTE)**

Life skills are basic skills that help individuals in leading a meaningful life and better adjustment in the society. Life Skills are defined as "abilities for adaptive and positive behaviour that enable individuals to deal effectively with the demands and challenges of everyday life". (WHO). Life Skill Education is one the important determiners of personality development process (UNESCO, 2001). Different types of Life Skills (eg., self-awareness, interpersonal relationships, time management, empathy, assertiveness, social behaviour, positive thinking, decision-making, problem solving, critical thinking, effective communication, etc.) play a crucial role in improving the dynamic nature of our personal coping process. The New Education Policy-2020 also caters

to Life Skill Education as an effective mode of education which can help the 21st century youngsters to achieve their goals by strengthening their abilities to meet the needs and demands of the present society. Hence, Institute of Education, Haldia is organizing this national seminar on the 21th December, 2022 keeping in mind the high demands of the above-mentioned life skills in the present society, especially for improving professional development among the trainee-teachers as well as teacher-educators.
